Evolution

Yes

No

## Origin of Earth

**4.6 billion years ago**

The sun and the planets coalesced out of a vast cloud of gas and dust

The Earth was a hot glowing ball of white hot gases.

Particles of gases were compressed together, giving off heat.

Gases cooled down so the Earth contracted and gases turned to liquids.

Heavy materials went to the center of the Earth and a liquid material went to the center.

# Variety Within Kind is Not Evolution.

## 4. Define Creation.

Bringing into being the: earth, heavens, plants, animals & mankind by sudden creation described in first 2 chapters of Genesis.

- a) Supernaturalistic or God was the Creator.
- b) Externally directed.
- c) Had a purpose.
- d) Complete.

## 6. What is the evidence for creation?

50

## 8. When did creation start?

- In the Beginning.

the Universe?

Spoke it into existence

**Formless, void, darkness was over the surface of the deep.**

**12.** How long did it take for the fruit trees to grow on Day 3?

Created fully developed.

**13. What are four functions for the lights in the expanse?**

1. Separate the day from night.
2. Signs.
3. Seasons.
4. Days & years.

created relative to God?**

In His Image.

Rom. 1:20

**16. Why was woman  
created for man?**

**To be his companion, he was  
lonely, Gen. 2:18**

# 17. Who is the Father of Evolution?

- Charles Robert Darwin

**18.** What did Charles Darwin say was the most uncertain thing in His Theory?

Missing Links.

“Why then is not every geological formation and every stratum full of such intermediate links? Geology assuredly does not reveal any such finely graduated organic chain; and this, perhaps, is the most obvious and serious objection which can be urged against the theory. ”, Charles Darwin, Origin of Species, Chapter 9.

## 19. What are 3 assumptions of Evolution?

- a) Life Began Before Intelligence.
- b) Matter Is Eternal.
- c) Best Naturally Survives (Natural Selection).

**20.** How old is the earth according to scientists? How old is the earth according to the Bible?

- 4.6 to 5.0 billion years old.
- Bible doesn't say.

→ Genealogies not complete but do indicate a young earth, 6-10 thousand years old.

**21.** Which of the following are the links between ape and man?

# Ramapithecus

- Fossil was found in India in 1934.
- Consisted of several teeth and jaw fragments.
- Fossil considered an hominid (individuals leading to man, but still sub-human).
- Ramapithecus is a basic kind of extinct apes.

**No Missing Link. Ape.**

# Australopithecus

- Assigned to a considerable number of different fossils.
- Found mostly in East Africa by Louis Leakey, others.
- Supposed lived 2-3 million years ago, walked erect and used crude tools.
- 500 cc brain size (comparable apes); teeth similar to Ramapithecus.
- Limb bone fossils indicate long-armed and short-legged.
- Baboon in Ethiopia today; similar teeth and jaw characteristics as Ramapithecus and Australopithecus.

**No Missing Link. Ape.**

# Homo Erectus

- Homo Erectus includes: Java Man, Peking Man, Heidelberg Man, and Meganthropus.
- Suppose lived about 500,000 years ago, walked upright, brains of about 1000 cc and simple implements and weapons.
- Two human skulls were found along with fossils for the Java man. Fossils consist of a skullcap, a thigh bone) and three teeth.
- Bones of Peking Man disappeared during World War II.
- Heidelberg Man consisted solely of a large jaw.
- Meganthropus consisted of two larger jaw bones and four teeth, and has been assigned by many to Australopithecus.

**No Missing Link. Man.**

# Neanderthal Man

This Neanderthal skull from La Chapelle-aux-Saints was

- Most famous of the "missing links".
- Pictured as a stooped, brutish, heavy brow ridges and the crudest of habits.
- No longer any doubt was truly human.
- No more different from modern man than the various tribes of modern man.
- Brain capacity was certainly human.
- Stooped skeletal structure likely due to disease, possibly arthritis or rickets.

**No Missing Link. Man.**

## 22. What is the Law of Biogenesis? Does it conflict with evolution?

- Life began from life.
- Yes. Evolution says life came from non-life.

**23.** In a cause-effect relationship (physics), can the effect be greater than the cause? How does this relationship impact the creation of the universe and the debate of Creation vs. Evolution?

\* No - cause always greater.

# Cause-Effect Relationship

**Cause**

**Effect**

- Develop A Design.
- Purchase Wood.
- Use Electric Saw.
- Assemble.
- Finish.

## 24. What is Intelligent Design? Does this support Evolution or Creation?

- The theory of intelligent design holds that certain features of the universe and of living things are best explained by an intelligent cause, not an undirected process such as natural selection.
- Supports Creation, Heb. 3:4.

# Einstein Quote

- “the harmony of natural law ... reveals an intelligence of such superiority that, compared with it, all the systematic thinking and acting of human beings is an utterly insignificant reflection”, **Ideas and Opinions -- The World as I See it, Albert Einstein, New York: Bonanza Books, 1974, pg. 40.**

**25.** What historical event  
had a tremendous impact on  
how the earth looks today? □
